### RESEARCH AND TEACHING INTERESTS

My primary research interests involve studying water and elemental cycles within coupled human and natural systems across varying temporal and spatial scales using both data science (big data) and case study (small data) approaches. Since joining the faculty in 2020, I have designed, built, and directed the Syracuse University **Hydrogeochemistry And eNvironmental Data Sciences (HANDS)** and **Noble Gases in Earth Systems Tracing (NEST)** Research Laboratories. In the WEN research group, we analyze water quality parameters and the isotopic compositions of selected elements (e.g., oxygen, hydrogen, carbon, nitrogen) and noble gases (i.e., He, Ne, Ar, Kr, Xe) using ion chromatography, optical emission spectrometry, water isotope analyzers, and mass spectrometry. Additionally, we develop and utilize emerging machine learning and geostatistical tools to assess the interplay between water and elemental cycles in Earth-surface systems, as well as investigate how these cycles are regulated by human activities (e.g., energy extraction, urbanization) and natural processes. I teach a variety of water-related and data science-related courses at Syracuse University for both undergraduate and graduate students, including *Introduction to Earth and Environmental Data Analysis* (EAR 201), *Water and Our Environment* (EAR 205), *Hydrogeology* (EAR 401/601), *Environmental Aqueous Geochemistry* (EAR 419/619), and *Machine Learning in Earth and Environmental Sciences* (EAR 400/600).

### EDUCATION

<b>University of Michigan</b>	Ann Arbor, Michigan
<b>Ph.D.</b> , Department of Earth and Environmental Sciences	<i>April 2017</i>
<b>M.S.</b> , Department of Earth and Environmental Sciences	<i>April 2014</i>
<b>University of Science and Technology of China (USTC)</b>	Hefei, China
<b>B.S.</b> , School of Earth and Space Sciences	<i>July 2011</i>

### POSITIONS HELD

- Assistant Professor, Department of Earth and Environmental Sciences, Syracuse University, Syracuse, NY (August 2020 – Present)
- Distinguished Postdoctoral Scholar, College of Earth and Mineral Sciences at Penn State University (May 2019 – July 2020)
- Postdoctoral Scholar, Earth and Environmental Systems Institute at Penn State University (February 2017 – April 2019)
- Graduate Student Researcher, Noble Gas Laboratory at University of Michigan (2011 – 2017)

- Undergraduate Researcher, Institute of Polar Environment at USTC (2009 – 2011)
- Undergraduate Researcher, Advanced Laboratory for Environmental Research and Technology at Suzhou, China (2009 Summer)

## TEACHING

### **EAR 400/600 – Machine Learning in EES, Syracuse University** *Every other spring*

- At this end of the course, students will be able to describe various concepts of programming, apply geospatial analysis and machine learning techniques to address real-world earth and environmental science questions, and interpret model outputs.

### **EAR 419/619 – Aqueous Geochemistry, Syracuse University** *Every fall*

- This course covers topics including processes and evolution of the chemical composition of water in the natural hydrologic cycle as well as methods of hydrochemical interpretation applied to ground water and pollution problems. This course includes lectures, field work, and laboratory work.

### **EAR 200 – Intro to Data Analysis in Earth Sci., Syracuse University** *Every spring*

- This course covers topics including describing and comparing sample populations, simple data manipulations, data visualization, creating and working with databases, surface contouring and modeling, basic GIS principles, and simple computer modeling of geologic processes.

### **EAR 205 – Water and Our Environment, Syracuse University** *Every other spring*

- This course covers the origin, occurrence, chemistry, and hydrology of water on earth. Class topics include climate change, contamination, and water supply issues within context of water sustainability.

### **EAR 401/601 – Hydrogeology, Syracuse University** *Fall 2020; Fall 2021*

- This course covers the fundamentals of groundwater hydrology and hydraulics.

### **EAR 600 – Foundations of Geosciences, Syracuse University** *Fall 2022*

- This course is intended to give students from across the geosciences the opportunity to explore and discuss some of the more exciting discoveries, mysteries, and theories underpinning

different aspects of the Earth system and to exchange ideas with people from across the different subdisciplines of our department.

**GEOSC/GEOG 497 – Data Mining in Environ. Sci., Penn State University** *Fall 2019*

- Applying both conventional and emerging data analytics tools to studying problems in the environmental sciences through mini-lectures and hands-on projects

**Co-teaching GEOSC 560 – Kinetics, Penn State University** *Spring 2019*

- Using data-driven models to assess the impact of natural and anthropogenic features on weathering rate on a watershed scale

**Workshop Instructor in Shale Network Workshop, Penn State University** *May 2018*

- Computer module demonstration and hands-on exercise: Created and prepared learning material; taught water chemistry about Marcellus-related spills for over 40 participants.
- Field trip to mock spill event: Assisted in organizing the field trip to mock spill.

**Interim Instructor, Penn State University** *April 2017*

- GEOSC 560 – Kinetics of Geological Processes: Taught basics of isotope geochemistry.

**Teaching Assistant, University of Michigan** *September 2013 – December 2016*

- EARTH 100s – Multiple introduction classes of earth sciences.
- EARTH 477 – Hydrogeology: Guided 50+ students to understand the fate and transport of contaminants from Underground Storage Tanks via hands-on hydrogeological lab work and the interpretation of stratigraphic information.
- EARTH 408 – Introduction to GIS in the Earth Sciences: Taught 24 students to implement 2D & 3D spatial analysis in ArcGIS; received positive teaching evaluation (**rated at 4.5-5.0 out of 5.0**) from students and teachers.

## STUDENT MENTORSHIP

### Awards Received by Advisees

Favour Epuna (SU, MS): 2021 GSA Graduate Student Research Grant

### Current Postdoctoral Scholars

Ruta Basijokaite	<b>Environmental Data Sciences</b>	2024 – Present
Sitangshu Chatterjee	<b>Noble Gas Geochemistry</b>	2024 – Present

### Current Graduate Students

Khi Atchinson	<b>PhD</b>	degree expected Spring 2028
Jianfeng (Nick) Su	<b>PhD</b>	degree expected Spring 2027
Zanchenling Wang	<b>PhD</b>	degree expected Spring 2027
Liyang Qin	<b>PhD</b>	degree expected Spring 2026

**Undergraduate Student Researchers**

Ryan Olivier-Meehan	<b>Earth Sciences and Data Analytics</b>	2023 – 2024
Aamna Khan	<b>Urban Hydrology and Water Quality</b>	2023 – 2024

**Previous Graduate Students (in reverse chronological order)**

Sam Nesheim	<b>MS</b>	2023	Research Technician at Michigan State Univ.
Beibei E	<b>MS</b>	2023	PhD Student at Texas A&M University
Favour Epuna	<b>MS</b>	2022	Staff Scientist at Aspect Consulting LLC
Rohit Patil	<b>MS</b>	2021	Software Development Engineer at Amazon

**Previous Undergraduate Student Researchers**

Jenna Klein	<b>Earth Sciences</b>	2022 – 2023
Linda Arterburn	<b>SUNY ESF</b>	Fall 2022
Samantha Walcott	<b>Earth Sciences</b>	Fall 2020 and Spring 2021

**Current Committee Member for**

Raven Polk	<b>PhD</b>	SU
Haejo Kim	<b>PhD</b>	SU
Madison Woodley	<b>PhD</b>	SU

**Past Committee Member for**

Changcheng Pu	<b>PhD</b>	2024	SU
